SUMMARY

As a dedicated Full Stack Developer and Theme Developer, I bring a robust foundation in web technologies like HTML, CSS, JavaScript, PHP, and experience with tools such as WordPress and Elementor to build responsive, dynamic, and user-friendly websites. My passion lies in creating engaging front-end experiences and developing efficient back-end solutions that align seamlessly with client needs.

EXPERIENCE

CAN info tech (Kathmandu)

Volunteer
Apr, 2022 - Apr, 2022

- Manage and guide the participant,
- Simple to complicate task like clearing the field,
- Providing sufficient water to participant,
- Help to manage the vid" crowd

RWS (p2h), (Kathmandu,Nepal)

Full Stack Developer
Jul, 2024 - Oct, 2024

As a Full Stack Developer and Theme Developer at P2H, I applied a range of programming languages—HTML, CSS, JavaScript, PHP—alongside WordPress and Elementor to create fully responsive, dynamic, and user-friendly websites for commercial projects. My role extended from front-end development and interactive functionality to custom theme creation, integrating backend solutions for a seamless content management experience tailored to client needs. Additionally, I leveraged my expertise in design tools like Figma, Illustrator, and Adobe XD to translate design concepts into functional, pixel-perfect websites.

EDUCATION

College Of Information Technology and Engineering (Kathmandu)

Bachelor of Information Technology
Apr, 2021 - Present

Supreme Academy Secondary School (Bhaktapur)

Management
Sep, 2018 - Mar, 2021

Ganesh Secondary School (Bhaktapur)

SEE
Apr, 2018

PROJECTS

Library Management System

- Project Captain,
- Supervise a project team on delegated tasks,
- Coordinate the design team,
- As well as create and coordinate a set of construction documents, codding, testing, debugging.

https://github.com/2santosh/Library-Management-System

Snake Game

- Project Captain,
- Supervise a project team on delegated tasks,
- Coordinate the design team,
- As well as create and coordinate a set of construction documents, codding, testing, debugging.

https://github.com/2santosh/Snake_Game

Smart Parking System

- Project caption,
- Supervise a project team on delegated tasks,
- Coordinate the design team,.
- Research planning, codding, assembling the hardware, debugging, documenting

https://github.com/2santosh/Smart_Car_Parking_System

Banking System

- Project caption,
- Supervise a project team on delegated tasks,
- Coordinate the design team,
- As well as create and coordinate a set of construction documents, codding, testing, debugging.
